Versa Shore APS Four-Week Pilot Program

About Versa Shore's Four-Week Pilot Program

The APS Four-Week Pilot Program is an accelerated project implementation designed to maximize your APS investment. Our implementation team works alongside your team for a focused four-week effort to design, develop and deliver a **Quick Win**.

Week One starts with a foundational Quick Start Workshop and sets the pace for the next four weeks of intense hands-on project implementation. Definition of key business drivers and Key Wins is covered in Week #1 along with environment setup.

Week Two picks up pace with a complete data inventory and a high level plan around data migration. Specific SSIS/DM packages are designed and tested for validity with test data.

Week Three completes the configuration and validation of the E-**L**-T process and ensures a repeatable process. Performance Tuning can be done if needed to streamline the flow of data.

Week Four takes the project deliverables from the prior three weeks and ensures a smooth transition to a TEST/Production environment. This process is thoroughly documented and shared with your team.

Objectives of the Four-Week Pilot

This program allows you to take a holistic view of your data warehousing needs and brings an agile development approach to your data warehousing team. By bringing the business and technical teams together, we are able to achieve a **unified** vision of business drivers, challenges and an accelerated implementation.

Week One
- APS Quick Start Workshop
- Current State Analysis
- Future State Analysis
- Define Key Wins and Business Drivers
- Set up DEV Environment

Week Two
- Complete Data Inventory
- Design and Plan Data Migration
- Design SSIS/DM Packages for E-**L**-T
- Conduct a test E-**L**-T run

Week Three
- Run E-**L**-T loads
- Debug mappings if necessary
- Performance Tune the data loads
- Re-run the data loads and Validate

Week Four
- Deploy to TEST/PROD environment
- Document the Migration Plan
- Change Management & Knowledge Transfer
- Post-deployment support and training

PEOPLE ON TRACK. PROJECTS ON TRACK. PERFORMANCE ON TRACK.

Versa Shore APS Four-Week Pilot Program

Versa Shore Methodology

Week One
- APS Quick Start Workshop
- Current State Analysis
- Future State Analysis
- Define Key Wins and Business Drivers
- Set up DEV Environment

Week Three
- Run E-**L**-T loads
- Debug mappings if necessary
- Performance Tune the data loads
- Re-run the data loads and Validate

Week 1
- Quick Start Program
- Definition
- Discovery

Week 2
- Design
- Configuration

Week 3
- Validation
- Deployment

Week 4
- Support

Week Two
- Complete Data Inventory
- Design and Plan Data Migration
- Design SSIS/DM Packages for E-**L**-T
- Conduct a test E-**L**-T run

Week Four
- Deploy to TEST/PROD environment
- Document the Migration Plan
- Change Management & Knowledge Transfer
- Post-deployment support and training

About Versa Shore

Versa Shore is a reputable Microsoft partner with several years of data warehouse expertise. Our staff has expert-level competency with industry leading BI systems. We have prior experience with the Microsoft ecosystem, as well as with data warehouse appliances from IBM, Teradata, and Oracle.

Armed with expertise in business analytics from a wide variety of verticals, Versa Shore provides industry-leading technical solutions that are reliable, flexible, scalable, and affordable.
